

**Please add the following new claims:**

7. (New) A radio access system comprising:  
  
means producing dialing signals; and  
  
a base station in radio communication with said means for producing dialing signals, said base station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not.

AG  
cont.

8. (New) A radio access system comprising:  
  
means for producing dialing signals; and  
  
a base station control station in radio communication with said means for producing dialing signals, said base station control station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not.

9. (New) A radio access system according to Claim 7, further comprising a base station control station in radio communication with said means for producing dialing signals, said base station control station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appln. No. 09/298,910

Sub 7  
C1

10. (New) A radio access system according to Claim 7 wherein:  
said means for producing dialing signals includes a telephone set having a dial pad with  
keys, a dialing signal being generated when a key of said dial pad is pushed; and  
said means for deciding comprises an inter-digit timer and a means for determining that a  
dialing signal has not been received for a predetermined period of time.

App  
cont

11. (New) A radio access system according to Claim 7 wherein said means for deciding  
comprises a means for counting said dialing signals.

Sub 7  
C1

12. (New) A radio access system according to Claim 8 wherein:  
said means for producing dialing signals includes a telephone set having a dial pad with  
keys, a dialing signal being generated when a key of said dial pad is pushed; and  
said means for deciding comprises an inter-digit timer and a means for determining that a  
dialing signal has not been received for a predetermined period of time.

13. (New) A radio access system according to Claim 8 wherein said means for deciding  
comprises a means for counting said dialing signals.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appln. No. 09/298,910

Sub  
C37  
14. (New) A radio access system according to Claim 9 wherein:

said means for producing dialing signals includes a telephone set having a dial pad with keys, a dialing signal being generated when a key of said dial pad is pushed; and

At  
concluded  
said means for deciding comprise an inter-digit timer and a means for determining that a dialing signal has not been received for a predetermined period of time.

15. (New) A radio access system according to Claim 9 wherein said means for deciding comprise a means for counting said dialing signals.
